## PASSION AND EXPECTATIONS

## **EMIRATIS LEAD IN PASSION FOR FOOTBALL**

#### Base: all adults

On average in the 34 countries surveyed, 17% of adults call themselves passionate about football. Another 23% also follow it and 21% watch games occasionally.

People in the United Arab Emirates are most likely to be passionate about football, followed by those in Saudi Arabia, India, and Indonesia. Passion is least widespread in Hungary, Japan and Canada.

Q. Thinking of the sport of soccer/football (NOT American football), how would you typically describe yourself?

| Global Country Average | 17%    | 23%    | 219         | %   | 40% |        |  |  |  |  |  |  |

- I am a passionate soccer/football follower and will watch as many games as possible at any given time
- I follow soccer/football, but will only watch games played by my favorite league/club and national team
- I will very occasionally watch soccer/football games played by leading league/club and national teams
- I don't follow soccer/football and do not watch soccer/football games at all OR Have never heard of 2022 FIFA World Cup

## FOOTBALL FOLLOWING ACROSS COUNTRIES

% I am a passionate soccer/football follower / I follow soccer/football

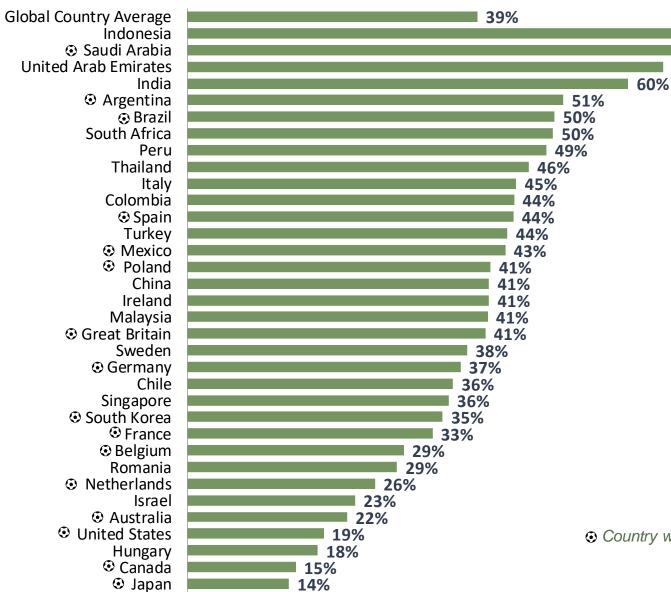

Football followers makeup at least half of all adults in only three of the 16 countries surveyed with a national team competing in the 2022 World Cup: Saudi Arabia, Argentina and Brazil.

In contrast, less than 20% in Japan, Canada, and the United States follow football.

### WILL HAVE A GOOD LUCK CHARM THEY KEEP DURING THE GAMES

% Definitely / probably will

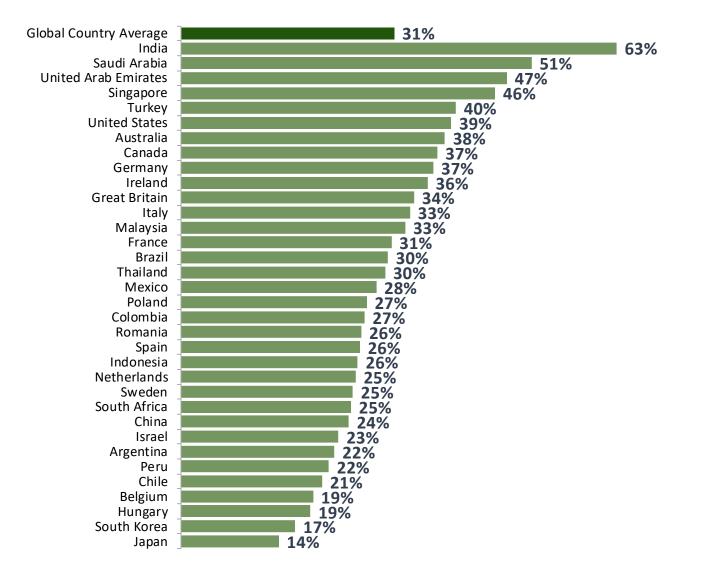

On average, nearly one in three globally expect to miss work or school during the World Cup to watch games, including almost two in three in India and about half in Saudi Arabia and UAE.

It's the case of less than 20% in Japan, South Korea, Hungary, and Belgium.

Q. Which of the following things do you expect you will do during the 2022 FIFA World Cup?

## WILL MISS WORK OR SCHOOL TO WATCH THE GAMES

% Definitely / probably will

## METHODOLOGY

- These are the results of a 34-country surveyed conducted by Ipsos on its Global Advisor platform between Friday, August 26 and Friday, September 9, 2022.
- Ipsos interviewed a total of 22,528 adults aged 18-74 in Canada, the Republic of Ireland, Israel, Malaysia, South Africa, Turkey, and the United States, 20-74 in Thailand, 21-74 in Indonesia and Singapore, and 16-74 in Argentina, Australia, Belgium, Brazil, Chile, China (mainland), Colombia, France, Germany, Great Britain, Hungary, India, Italy, Japan, Mexico, the Netherlands, Peru, Poland, Romania, Saudi Arabia, South Korea, Spain, Sweden, and the United Arab Emirates.
- A screening question identified 15,674 individuals who stated they have seen, heard or read about the FIFA World Cup. This group responded to the subsequent questions.
- The samples in Argentina, Australia, Belgium, Canada, France, Germany, Hungary, Italy, Japan, the Netherlands, Poland, Romania, Singapore, South Korea, Spain, Sweden, Great Britain, and the U.S. can be taken as representative of their general adult population under the age of 75.
- The samples in Brazil, Chile, China, Colombia, India, Indonesia, Ireland, Israel, Malaysia, Mexico, Peru, Saudi Arabia, Singapore, South Africa,

Thailand, Turkey and the UAE are more urban, more educated and/or more affluent than the general population. The survey results of these countries should be viewed as reflecting the views of the more connected segment of their population.

- The data is weighted so that each country's sample composition best reflects the demographic profile of the adult population.
- The "Global Country Average" reflects the average result for all the countries where the survey was conducted. It has not been adjusted to the population size of each country and is not intended to suggest a total result.
- Where results do not sum to 100 or the 'difference' appears to be+-1 more/less than the actual, this may be due to rounding, multiple responses or the exclusion of don't knows or not stated responses.
- The precision of lpsos online polls is calculated using a credibility interval with a poll of 1,000 accurate to +/- 3.5 percentage points and of 500 accurate to +/- 4.8 percentage points. For more information on lpsos's use of credibility intervals, please visit the lpsos website.
- The publication of these findings abides by local rules and regulations
